Air conditioners are powered by electricity. You can compare efficiencies of different air conditioner models by checking the SEER (Seasonal Energy Efficiency Ratio) ratings, available on manufacturer websites. The published ratings provide a standardized method for comparing how much cooling performance you get for the electricity you use. Using these ratings is a lot like miles per gallon for your car – the higher the number, the more efficient the product preferences, weather patterns in your area and much more.

So when you are comparing air conditioners, be sure to look at the SEER ratings before you make your decision.

Willy Carrier’s meticulous attention to quality and detail led to a major cultural shift in the way we live indoors. More than a century later, Carrier Corporation operates with a unique willingness to develop new technology, the confidence to revise proven designs and the ability to deliver results with every new installation.

Part of that equation is our nationwide network of experts you can turn to for all your indoor comfort needs. Your local Carrier dealer is well equipped to evaluate your home – everything from size, window placement, ductwork, existing and other structural specifics – and create a customized system designed around your lifestyle. So when it’s time to make a choice for your family’s comfort, make the best decision you’ll ever make – Carrier – and let the experts do the rest.

### Extra-Efficient Air Conditioner: Designed with Your Comfort in Mind

Extra-efficient air conditioners offer a range of efficiencies up to 21.0 SEER to potentially reduce your energy usage and environmental impact.

### The Total Indoor Comfort System

Infinity® series two-stage air conditioners offer plenty of potential for annual savings while providing extra-comfortable cooling. When compared to a standard efficiency air conditioner, you can save up to $721 per year.* And, if you are replacing an older, less efficient model, the savings can be even more significant.

*Based on AHRI method for estimated operating cost using U.S. average cooling hours.

#### In-Home Comfort

- **Temperature Control**: The Infinity Air Purifier monitors indoor air quality by capturing and neutralizing airborne pathogens that can enter your home.
- **Humidity Control**: The Infinity Air Purifier maintains the ideal level of humidity for optimal comfort and longevity.
- **Air Quality**: The Infinity Air Purifier captures and neutralizes household irritants and allergens.
- **Compared to the Competition**: The Infinity Air Purifier provides superior performance compared to the average air conditioner.

### Extra-Efficient Air Conditioner

Extra-efficient air conditioners are designed with extra-comfortable cooling. When compared to a standard efficiency air conditioner, you can save up to $721 per year.* And, if you are replacing an older, less efficient model, the savings can be even more significant.

Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind’s most pressing challenges by controlling the indoor environment. A leading engineer of his day, Dr. Willis Carrier would play a far more prominent role in our world today.

Carrier’s foresight changed the world forever and paved the way for over a century of innovation in air conditioning and indoor climate control. The development of refrigeration technology has been a testament to the reliability, durability and enduring quality of Carrier products.

Leaders in Technology

It’s About Your Comfort

The Carrier® Infinity™ series air conditioners represent years of design, development and testing with one goal in mind – making you more comfortable. We have taken the lead in creating new technologies that deliver the comfort and efficiency you deserve while staying ahead of industry trends and global initiatives.

You don’t lead an industry for more than 100 years by accident. Carrier has maintained its position and reputation through relentless innovation and uncompromising quality control at every stage of product life—from concept to completion. Once our product is installed in your home, you can be confident that durable construction and built-in reliability features ensure your comfort for years to come.

Uncompromising Quality

• Built in reliability: Forward-swept fan blades enhance performance and provide sound reduction.
• Smart electronics that monitor system operation and a compressor-enhancing filter help keep critical components operating at their best.
• Durability: WeatherArmor Ultra™ protection allows the Carrier® Infinity series to perform and look great for years.
• Energy efficiency: The Carrier® Infinity series meet ENERGY STAR® guidelines for energy efficiency.

Limited Warranty

To the original owner, the Carrier® Infinity series two-stage air conditioners are covered by a 10-year parts warranty and a 10-year limited labor warranty on parts and labor. For more information, please contact your Carrier dealer about optional labor warranties.

PurOn® Refrigerant

PurOn® refrigerant is environmentally sound and won’t deplete the ozone layer. Carrier systems with PurOn refrigerant meet the standard for environmentally sound air conditioners and heat pumps performance well ahead of industry competitors. Today, Carrier air conditioners and heat pumps using PurOn refrigerant show exceptional reliability and are a testament to our industry leadership.

Innovation and the determined engineer solved one of mankind’s most pressing challenges by controlling the indoor environment. A commitment by delivering reduced control in the environment that matters most – your home.

Carrier’s foresight changed the world much more and paved the way for over a century of innovation in air conditioning and indoor climate control. The development of refrigeration technology has been a testament to the reliability, durability and enduring quality of Carrier products.

As an ENERGY STAR® partner, Carrier Corporation has determined that the Infinity series air conditioners meet ENERGY STAR guidelines for energy efficiency.

Standard systems noticeably boost cooled air at one speed before shutting off, which can lead to costly fluctuating temperatures. The Infinity series air conditioners continuously boost cooled air at one speed before shutting off, which can lead to costly fluctuating temperatures. The Infinity series air conditioners continuously boost cooled air at one speed before shutting off, which can lead to costly fluctuating temperatures.

Carrier gives you ultimate command of comfort and energy savings when you include an Infinity variable-speed furnace to the Infinity air conditioner. You can use the sophisticated energy management features in the seasonal comfort of your home.

All year long, humidity affects the temperature at which you feel most comfortable. That’s why Carrier’s ideal Humidity System technology allows you to control humidity levels even when your system isn’t actively heating or cooling. You’ll feel cooler at higher temperatures in the summer and warmer at lower temperatures in the winter.

PurOn® refrigerant is environmentally sound and won’t deplete the ozone layer. To the original owner, the Carrier Infinity series two-stage air conditioners are covered by a 10-year parts warranty upon timely registration of your new equipment.3 Ask your Carrier dealer about optional labor warranties.

*10-year parts limited warranty is subject to timely registration of your new equipment. See warranty certificate at carrier.com for complete details.
What Efficiency Means to You

Air conditioners are powered by electricity. You can compare efficiencies of different air conditioner models by checking the SEER (Seasonal Energy Efficiency Ratio) ratings, available through your Carrier dealer or manufacturer web site. The published ratings provide a standardized method for comparing how much cooling performance you get for the electricity you use. Using these ratings is a lot like miles per gallon for your car – the higher the number, the more efficient the product is. Actual air conditioner performance will vary based on the age and condition of your home, personal comfort preferences, weather patterns in your area and much more.

So when you’re comparing air conditioners, be sure to look at the SEER ratings before you make your decision.

Part of that equation is our nationwide network of experts you can turn to for all of your indoor comfort needs. Your local Carrier dealer is well equipped to evaluate your home – everything from window placement, ductwork, existing and other structural specifics – and create a customized system designed around your lifestyle. So when it’s time to make a choice for your family’s comfort, make the best decision you’ll ever make – Carrier – and let the experts do the rest.

The Total Indoor Comfort System

Infinity® two-stage air conditioners offer a range of efficiencies up to 21.0 SEER to potentially reduce your energy usage and environmental impact.

### Greater Operational Efficiency

Infinity® series two-stage air conditioners offer plenty of potential for annual savings while providing extra-comfortable cooling. When compared to a standard efficiency air conditioner, you can save up to $121 a year.†† Your annual savings are greater the higher the SEER rating.

The Total Indoor Comfort System

Infinity® series two-stage air conditioners provide reliable, high-efficiency cooling for improved indoor comfort and energy savings.

Infinity®Cool™ products provide reliable, high-efficiency heating for long-lasting comfort and energy savings.

Infinity®Care™ is designed with the proven reliability and energy efficiency and years of reliable service.

The Comfort Air Purifier removes airborne pollutants by capturing and inhibiting the growth of contaminants on your home’s conditioned air. Ventilating combines fresh air with conditioned air for improved air quality and maximum comfort in your tightly constructed home.

Humidification reduces moisture to dry air to suit your home with cleaner, fresher air.

Ventilation sets different temperatures for up to eight different areas of your home, creating a truly comfortable and embalmed home environment.

Varying temperature control is accomplished with the Infinity Interface to the Infinity System, the control panel that allows you to control temperature, humidity, fan speed and ventilation.

**Infinity® Series Air Conditioners**

Two-Stage, Extra-Efficient Air Conditioners with up to 21.0 SEER
