Family Protection You Can Trust

Things to Consider Before You Buy

Comfort and Safety

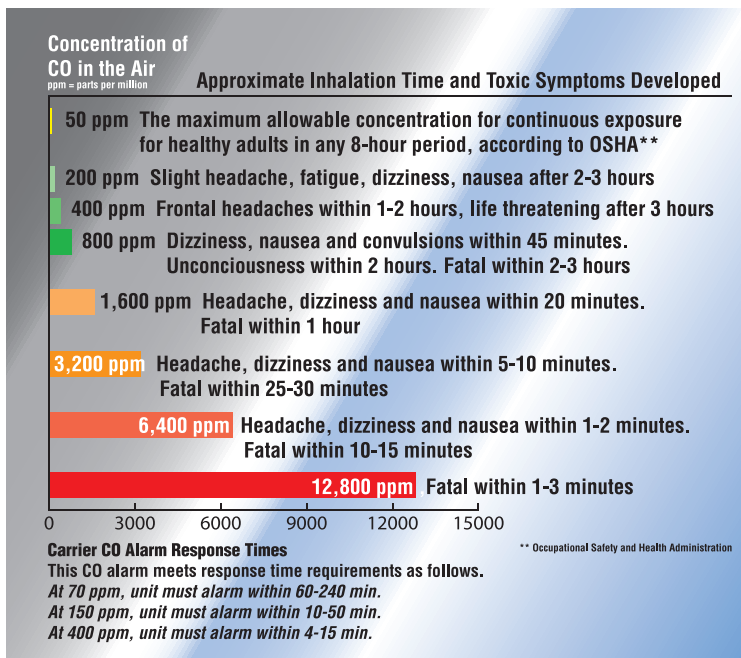

Carrier specializes in creating a customized home comfort system tailored to your needs with our broad selection of residential heating and cooling products. Your Carrier dealer can help you choose the best system and accessories for your home, including a Carbon Monoxide Alarm with Carrier features that further enhance your indoor environment. Carrier's Carbon Monoxide Alarm provides peace of mind with its ability to detect and warn about dangerous levels of carbon monoxide in your home.

- Carbon monoxide (CO) is a colorless, odorless gas produced by incomplete combustion of fuels such as natural and LP gas, kerosene, coal, wood and charcoal. Any fuel burning device, including appliances, automobiles, and fireplaces can produce CO.
- Exposure to CO can cause fatigue, chest pains, impaired vision and coordination, headaches, dizziness, confusion, nausea and, can even be fatal.
- Every year, there are more than 2,000 fatalities in the United States from CO produced by improperly installed or maintained fuel-burning appliances.
- Carrier recommends placing a Carbon Monoxide Alarm on each level of the house and in every bedroom.

Peace of Mind

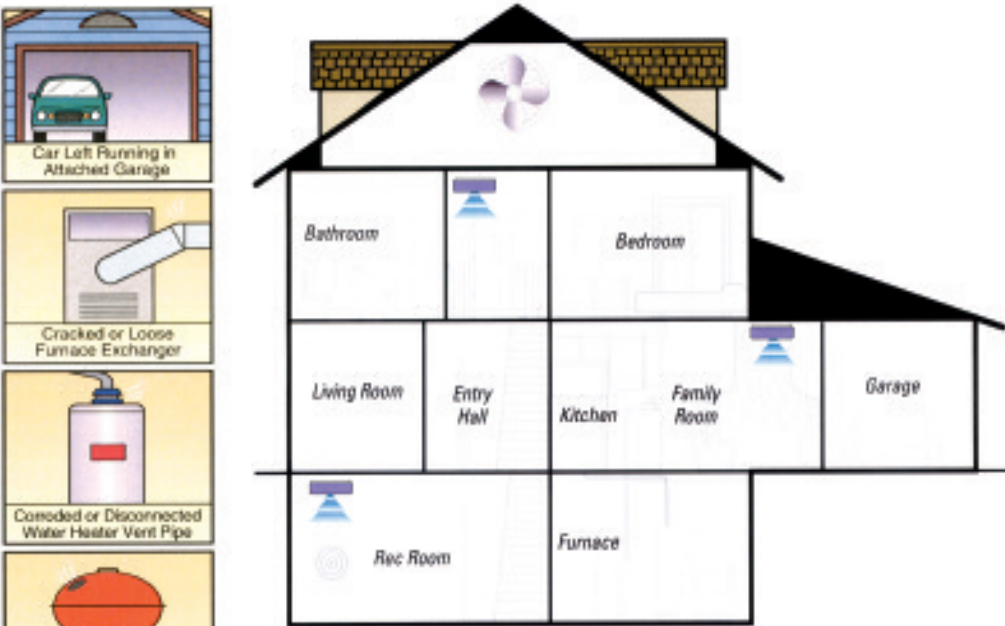

Carrier's Carbon Monoxide Alarm uses sophisticated electronics and unmatched sensor technology to detect and record the levels of CO circulating in your indoor air. You can monitor the current CO level in your home on a large, easy-to-read digital display. When dangerous levels of CO are present, a loud, audible alarm alerts you and your family, automatically.

- The Carbon Monoxide Alarm's peak level memory allows health care professionals to quickly assess the level of exposure in the event of an alarm.
- A rechargeable lithium ion battery ensures continued detection and warning even during a power outage.
- For peace of mind, you can check to see if your CO alarm is functioning properly with the simple push of a button.
- Carrier recommends checking the alarm weekly and having it professionally inspected on an annual basis.

Carrier's Carbon Monoxide Alarm protects you and your family from acute carbon monoxide poisoning by alerting you to dangerous levels of carbon monoxide inside your home.

Recommended Placement Locations

Common Sources of Carbon Monoxide

Technology

- 1 **Continuous digital display** - lets you monitor the level of CO currently in your home. Display is updated every 15 seconds.
- 2 **Test / Reset button** - checks the unit's electronic circuitry and horn. Resets the unit during alarm.
- 3 **Peak level button** - displays the highest CO level recorded since the alarm was last reset or unplugged.
- 4 **AC plug adapter** - provides constant power to the unit and allows flexibility of placement: direct plug-in, wall-mounted or tabletop.
- 5 **Rechargeable lithium ion battery** - provides uninterrupted protection even during a power outage.

Warranty

Carrier's Carbon Monoxide Alarm is protected by an industry leading seven-year limited warranty. Ask your Carrier dealer for details.

Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
