High-Efficiency and High-Performance Comfort—Year-Round!

No matter the season, your family will enjoy premium indoor comfort with your new Amana® brand APG15 Packaged Gas/Electric Unit, our premier gas-electric product. And with the energy savings (as compared to lower AFUE units) and durability this packaged unit provides, that comfort could extend all the way to your pocketbook!

Your new Amana brand APG15 Packaged Gas/Electric Unit combines what we believe to be the best of the Amana brand's furnace and condensing unit technologies, all in one self-contained "package." With its advanced, high-efficiency scroll compressor, the unit's air conditioner reaches cooling efficiencies of up to 15 SEER, and the heating component provides efficiencies of 80% AFUE. Add to that the durability provided by the Amana brand's stainless-steel, tubular Million-Air™ heat exchanger, and you have a unit designed to provide you with premium comfort for years to come.

We're so confident in the quality of your Amana brand APG15 Packaged Gas/Electric Unit that we back both its heat exchanger and its compressor with a **Lifetime Limited Warranty*** for the original, registered homeowner for as long as you own your home. Not many companies will go to such lengths to reassure the buyer of the quality of their products. In our opinion, few make a product close

MILLION-AIR™
STAINLESS-STEEL
HEAT EXCHANGER

to the quality of the Amana brand APG15 Packaged Gas/Electric Unit.

Million-Air™ Heat Exchanger

The heart of your Amana brand packaged unit's heating technology is its patented Million-Air™ stainless-steel tubular heat exchanger. Formed using our patented dual-diameter pipe and wrinkle-bend technologies, the Million-Air is built to last. One of these heat exchangers has endured over two million extreme-temperature test cycles—and it is still going strong.

Efficient Condensing Coil

Our coil design provides maximum efficiency in minimum space. Aluminum fins are bonded to enhanced copper tubing for more efficient heat transfer. All coils are leak checked electronically and pressure-tested three times during the manufacturing process to assure reliability.

In addition to using a high-quality coil, we also include a filter dryer which helps to remove moisture or debris from the refrigerant system.

High-Efficiency Scroll Compressor

Your Amana brand APG15 Packaged Gas/Electric unit also boasts a high-performance, high-efficiency compressor, which operates in tandem with our high-efficiency coil. These high-quality components together cool your home effectively while saving you money on your energy bills compared to lower SEER units.

Energy Efficiency

A packaged unit's cooling efficiency is indicated by its Seasonal Energy Efficiency Ratio (SEER), which is a measurement of a condensing unit's efficiency developed by the EPA. Your new Amana brand Packaged Gas/Electric Unit, which provides cooling efficiencies of up to 15 SEER, offers substantial energy cost savings compared to lower SEER units.

When properly installed, your Amana brand APG15 Packaged Gas/Electric Unit meets the higher standard of the Environmental Protection Agency's (EPA's) Energy Star Program.**

R-410A Refrigerant

Compared to lower SEER, R-22 refrigerant units, your new Amana brand APG15 Packaged Gas/Electric Unit will not only provide you with money-saving cooling performance for many years, but it also features R-410A refrigerant. Since this refrigerant does not contain chlorine, it is more environmentally friendly than R-22 refrigerant, which is currently used in most air conditioning systems.

** ENERGY STAR ratings are dependent upon conditions beyond equipment installation. To make certain your HVAC equipment qualifies for the ENERGY STAR designation, get complete information at www.energystar.gov.

Built to Last and Last

Your space-efficient Amana brand APG15 Packaged Gas/Electric Unit can be ground- or rooftop-mounted. Its cabinet is built using high-quality, heavy-gauge, zinc-coated steel with a weather-resistant powder-paint finish. A stamped steel louvered grille protects the condenser coil, and the unit's subtle color scheme complements nearly all exterior home environments.

Premium Warranties

We're so confident in the lasting power of your Amana brand APG15 Packaged Gas/Electric Unit that we protect it with what we believe to be some of the best warranties* in the industry. We cover both the heat exchanger and compressor in this unit with a **Lifetime Limited Warranty* for the original, registered homeowner for as long as you own your home.** Add to that, a **10-Year Parts Limited Warranty* on all functional parts.**

For even greater peace of mind, ask your dealer or visit our web site at www.amana-hac.com for more details about **Asure**,SM an affordable Parts and Labor Extended Service Plan for your entire Amana brand HVAC system.†

Major Features

- Up to 15 SEER cooling efficiency
- Chlorine-free R-410A refrigerant

- 80% AFUE heating efficiency
- Durable, patented Million-Air™ stainless-steel tubular heat exchanger
- **Lifetime Limited Warranty*** for the original, registered homeowner on the heat exchanger and compressor for as long as you own your home

- **10-Year Parts Limited Warranty* on all functional parts**

- High-efficiency scroll compressor
- Attractive louvered cabinet/coil guard
- Quality, powder-paint finish resists fading and corrosion
- Fully insulated blower compartment for quiet operation
- Meets California low-NOx emissions requirements

Additional Information

Before purchasing this appliance, read important information about its estimated annual energy consumption, yearly operating cost, or energy efficiency rating that is available from your retailer.

Amana Quality

Americans have been relying on long-lasting Amana® brand products since 1934, when Amana, Iowa, native George Foerstner accepted the challenge of building a dependable beverage cooler. Since then, the Amana brand has enjoyed many firsts, including developing the first cold storage locker, being the first manufacturer to nationally market an upright freezer for home use, and introducing the first portable countertop microwave oven.

The residents of Amana, Iowa, began a long history of pioneering and craftsmanship, and that spirit continues today in the manufacturing of quality Amana Heating & Air Conditioning products. From the technology behind our patented Million-Air™ heat exchanger to what we believe to be some of the industry's best warranties to the inclusion of high-quality filter dryers in each of our air conditioners and heat pumps, we remain committed to Amana's legacy of providing consumers with heating and cooling products that are built to last.
