GPC13M — 13 SEER Packaged Air Conditioner

We build quality into every component of our Amana® brand heating and air conditioning products. That's why our **Amana® Distinctions™ brand GPC13M 13 SEER Packaged Air Conditioner** has a Seasonal Energy Efficiency Rating (SEER) of 13—a significant improvement in money-saving efficiency over many of the units installed outside of homes today. Your savings can add up very quickly—especially in hot weather, when energy use can increase dramatically.

The savings start with our efficient condensing coil design. We use only high-quality rifled copper tubing and corrugated aluminum fins, which withstand the corrosive effects of moisture and extreme temperatures. Our coil design provides more cooling surface, which further increases efficiency and decreases your energy bill. Additionally, every coil that goes into an **Amana® Distinctions™ brand Packaged Air Conditioner** is thoroughly tested.

Combine this unique coil design with our high-quality compressor, and you have an energy-efficient **Amana® Distinctions™ brand GPC13M 13 SEER Packaged Air Conditioner** that you can rely on for years to come.

Quality You've Come to Expect from Amana Brand Products

In addition to outstanding energy efficiency, the **Amana® Distinctions™ brand GPC13M 13 SEER Packaged Air Conditioner** provides you with the following benefits:

- High-quality, energy-efficient compressor with internal relief valve
- Totally enclosed, permanently lubricated condenser fan motor
- Louvered condenser coil protection
- Fully charged R-22 system
- Fully insulated blower compartment for quiet operation
- Attractive Architectural Gray powder-paint finish that resists fading and corrosion

Average Yearly Cooling Costs**

8 SEER:	\$536
13 SEER:	\$330

A new **Amana® Distinctions™ brand GPC13M 13 SEER Packaged Air Conditioner** could save you up to 38% on your combined heating and cooling bills when compared to older units, assuming new and previous units are sized to provide the same output capacity.

** These figures represent estimated annual operating costs of a 36,000 BTUH system at \$0.0981/KWH in St. Louis, Mo., and were generated using the Energy Star® savings calculator provided by the DOE and EPA. These figures are for comparison purposes only; actual costs will vary according to personal use habits, square footage, location, how the unit is installed, and the construction of your home.
