

# XB300

AIR CONDITIONER

Your customers expect quality and reliability in all applications.

*It's Hard To Stop A Trane.®*

# READ ONLY

The multi-family housing market has a specific set of needs when it comes to comfort. First and foremost, *reliability*. The Trane XB300 delivers a smart, hardworking, competitively-priced option.

## The single best solution for multi-family dwellings.

The Trane XB300 air conditioner is built with the same legendary reliability and durability that comes with every Trane product, from entry level to the top of the line, with special attention paid to the unique needs of multi-family dwellings.

We know easy replacement and easy storage of backup units can help keep customers comfortable and happy. Therefore, we designed the XB300 to be lighter and more compact than

comparable units, without sacrificing Trane's legendary durability.

The Trane XB300 is also designed to operate with a lower refrigerant charge that not only reduces the unit's carbon footprint, but also allows less stress to be placed upon the components for increased reliability.

## Trane reliability through and through.

The XB300 is a solid performer, because we've designed and built it to be worthy of the Trane name. Careful consideration was put into every aspect of the XB300, to make sure it exceeds your expectations.

Special features include:

- **Climatuff® compressor.** Trane's legendary workhorse, designed and built like nothing else on the planet. Tested in the harshest conditions to ensure the unmatched reliability and durability customers expect from Trane. It's the same compressor you'll find throughout our lineup, including our top of the line XL20i.
- **Climatuff™ coil.** Made with all-aluminum construction to reduce the chance of corrosion caused not only by the elements, but by contact between aluminum and copper.
- **Trane's exclusive Manual Charge Assist.™** Helps ensure your customers get a system with the correct charge providing expected performance and efficiency.
- **Compact construction and light weight.** Makes the XB300 easier to transport and easier to install in places where space is a premium. It also makes storage of replacement units more convenient.
- **A warranty worthy of the Trane name.** The XB300 may be competitively priced, but it's still a Trane. That means it's built to Trane's high standards. It also means it's backed by a no-nonsense warranty that protects you and your multi-family customers with the peace of mind you'd expect from Trane.

## About Trane

For more than 100 years, Trane has focused on building the most reliable, best performing home comfort systems in the market. Every system we make is constructed with premium materials, using designs that have been proven time and again in some of the most grueling conditions possible. Today, we're the most recognizable HVAC brand in America, and the one consumers most associate with reliability. In short, when you offer your multi-family customers a Trane system, you're giving them the reliability and peace of mind that comes with a system built by experts.
