Air Conditioning & Heating

HIGH-EFFICIENCY PERFORMANCE

As the owner of a high-efficiency Goodman® brand SSZ14 R-410A Heat Pump, you have made one of the best purchasing decisions possible in the HVAC marketplace. At Goodman, we strive to build heating and air conditioning equipment that offers high performance, energy efficiency, durability, and an environment-complementing design — all at a price that will have you saying **"Thank goodness for Goodman."**

In particular, your Goodman brand SSZ14 Heat Pump will provide you with reliable cooling at money-saving energy efficiency levels as compared to lower SEER heat pump units.

COMFORT. SAVINGS. PERFORMANCE.

ENJOY THE COMFORT

You can count on your Goodman brand SSZ14 Heat Pump to keep you cool on even the hottest summer days and warm on the coldest days of winter. Your Goodman brand heat pump starts with a high-performance, high-efficiency compressor, which operates in tandem with our high-efficiency coil. The coil is made of rifled refrigeration-grade copper tubing and corrugated aluminum fins in a design that maximizes surface area. These high-quality components together cool your home effectively.

QUIET YOU CAN COUNT ON

We know that the last thing you want to hear at night is a noisy heat pump starting up. So we build our Goodman brand SSZ14 Heat Pumps with sound-dampening features that help ensure that your cooling system doesn't interfere with a good night's sleep. We rely on a quiet condenser fan system — a three-bladed fan and a unique louvered sound-control top — to reduce fan-related noise. Your Goodman brand SSZ14 Heat Pump will keep your home cool and comfortable, year after year.

Goodman's SMARTCOIL 5mm tube condensing coil design optimizes the heat transfer ability of R-410A refrigerant compared to standard 3/8" copper tubing.

SMARTCOIL™ TECHNOLOGY SMALLER IS SMARTER

Long ago the HVAC industry determined that the combination of copper tubing and aluminum fins provided the most efficient transfer of thermal heat available. Today, the Goodman brand has improved upon this industry standard by making the condenser coil copper tubing smaller and smarter. The result is a heat pump unit that can offer high efficiency, use less refrigerant, and deliver money-saving and energy-saving comfort to you for years and years.

R-410A REFRIGERANT

Compared to lower SEER, R-22 refrigerant units, your new Goodman brand SSZ14 heat pump system will not only provide you with money-saving cooling performance for many years, but it also features R-410A refrigerant. Since this refrigerant does not contain chlorine, it is more environmentally-friendly than R-22 refrigerant, which is currently used in most air conditioning systems.

Introduced in 1995, R-410A refrigerant has helped increase the durability and reliability of heat pump compressors.

IMPRESSIVE FEATURES & BENEFITS:

GOODMAN® BRAND SSZ14 R-410A HIGH-EFFICIENCY HEAT PUMP

- A high-performance, high-efficiency compressor
- High-efficiency heating performance up to 9.0 HSPF
- Service valves with sweat connections and easy-access gauge ports
- Factory-installed, bi-flow liquid line filter drier
- SmartShift™ defrost technology with short-cycle protection
- 5mm SmartCoil™ condenser coil in select models
- Brass liquid and suction line service valves
- Copper tube/aluminum fin condenser coil
- Reliable time-initiated, temperature-terminated defrost control
- Contactor with lug connection
- Ground lug connection
- Louvered sound control top design
