We build quality into every component of our Amana® Distinctions® brand heating and air conditioning products. That's why our **Amana Distinctions brand DGMVC8 Variable-Speed Gas Furnace** has an AFUE rating of 80%. Unlike single-stage gas furnaces that operate 'all on' or 'all off,' an Amana Distinctions brand multi-speed gas furnace typically runs up to 80% of the times in the low-speed capacity on most days. But when the temperature outside is frightfully cold, this furnace quietly ramps up to high-speed capacity to deliver all the warm, comfortable heat your home needs.

When operating at low-speed levels, your Amana Distinctions brand gas furnace consumes less energy to keep your home comfortable compared to single-speed furnaces. The 80% AFUE rating on this gas furnace means that up to 80 cents of every \$1.00 of heating energy expense warms your home. Some older central heating systems are rated at 60% AFUE (Annual Fuel Utilization Efficiency). The Department of Energy established the AFUE system to calculate the annual operating cost of residential gas furnaces.

The award-winning design of the primary heat exchanger in the **Amana Distinctions brand DGMVC8** is unique. It's constructed from tubular aluminized-steel and formed into a dual-diameter configuration. The use of wrinkle-bend technology results in an extremely durable heat exchanger. A heat exchanger often is considered the essential component of any gas furnace.

Additional Information

Before purchasing this appliance, read important information about its estimated annual energy consumption, yearly operating cost, or energy efficiency rating that is available from your retailer.

Quality You've Come to Expect from Amana Brand Products

In addition to outstanding energy efficiency, the **Amana Distinctions brand DGMVC8 Variable-Speed Gas Furnace** provides you with the following benefits:

- Aluminized-steel tubular primary heat exchanger
- ComfortNet™ Communicating Systems compatible
- Efficient and quiet, variable-speed ECM circulator motor
- Durable Silicon Nitride igniter
- Electronic ignition control with DualSaver™ technology
- Two-stage gas valve
- Electronic control board with self-diagnostics
- All models comply with California NOx emissions standards
- Corrosion-resistant vent blower
- Fully insulated, heavy-gauge steel cabinet with durable baked-enamel finish
