Trane Ultra Efficiency EarthWise™ Hybrid Split Systems

Two different fuel sources.
One very comfortable system.

It's Hard To Stop A Trane.®

The system that stays efficient, while you stay comfortable.

Trane EarthWise™ Hybrids. Innovative, efficient comfort from two fuel sources.

A Trane EarthWise Hybrid brings two different technologies together for ultimate efficiency and outstanding comfort. A multi-stage Trane XLi electric heat pump works in tandem with a variable-speed Trane 80 or 95 furnace to create a system with the flexibility to use two energy sources, so you're using the most efficient method to stay comfortable all year long. Factor in the continuous humidity control of Comfort-R™ and the optional whole-house filtration down to .1 micron offered by Trane CleanEffects,™ and you'll enjoy a home that's cleaner, fresher and incredibly comfortable every day of the year.

One smart system.

Your EarthWise™ Hybrid is all about flexibility. Specifically, the flexibility to switch between more than one fuel source to make sure you're always using the most cost-efficient method to stay comfortable.

During the summer, your Trane electric heat pump draws heat from inside your house and radiates it outside, using the furnace's blower to circulate cool air. During cooler weather, your heat pump reverses to pull heat from the outside in to warm your home. Even in most northern climates, there may still be enough residual heat for the heat pump to operate well into fall.

When there is no longer enough residual heat found outside, the heat pump lets the furnace operation take over, heating your home with the cozy warmth of natural gas instead of electricity. The switch point is automatically set by your dealer based on fuel costs in your area, so you're always using the most cost-effective method to stay comfortable.

READ ONLY

1 Trane XLi Heat Pump

Uses Trane's own Spine Fin™ coil and Climatuff® compressor to draw heat away from your home in the summer, and draw heat in during winter.

2 Trane Variable-Speed Gas Furnace

Gently ramps up airspeed to distribute heated and cooled air more evenly all year. During the coldest months, it takes over for your electric heat pump to keep you warm.

3 Trane All-Aluminum Comfort Coil

All-aluminum construction provides resistance to corrosion, while fewer brazed joints mean enhanced reliability over time.

4 Trane XL900 or XL950 Thermostat

A powerful thermostat with a convenient touchscreen interface. Automatically switches between the heat pump and furnace for energy-conscious fuel use. For added efficiency, the XL950 includes a Dual Fuel economic calculator that uses local utility rates to determine the most cost-effective temperature at which to switch.

5 Trane CleanEffects™ (optional)

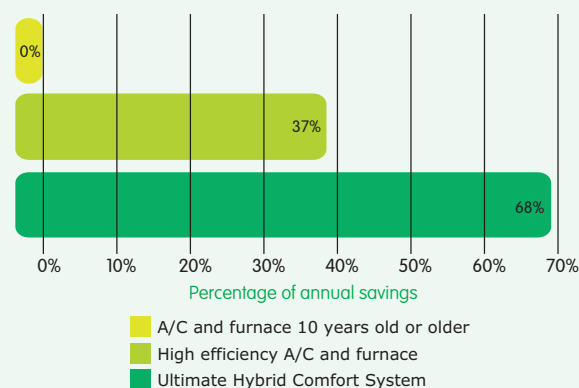

Creates an incredibly clean and fresh indoor environment with patented whole-house filtration that removes up to 99.98% of particles down to .1 micron.

Staging means consistent comfort and continual efficiency.

One of the many reasons your EarthWise Hybrid system is so efficient has to do with staging. Unlike conventional systems that are either "on" or "off," a staged system has different "speeds" at which it can operate. For example, during a mild fall day, your two-stage Trane heat pump would operate at its lowest stage, because not a lot of heat is needed. Should the temperature drop, your heat pump would ramp up to a higher stage to pull more heat from the air. Likewise, a multi-stage furnace will burn fuel at different rates depending on the temperature in your home.

The more stages your system has, the more precise your comfort, and your efficiency, can be.

Average annual heating and cooling cost savings a Trane EarthWise™ Hybrid split system can provide.

* The above example is based on weather conditions in Chicago and average national heating and cooling costs. Potential energy savings may vary depending on your lifestyle, system settings, equipment maintenance, local climate, home construction and installation of equipment and duct system. To find out how much you can save on heating and cooling costs in your area, ask your dealer for details.

Peace of Mind: Yet another reason you need a Trane.

Your investment in a Trane EarthWise™ Hybrid split system is well protected with manufacturer warranties on the heat exchangers, compressors, coil and functional parts. Optional extended warranties are also available on parts and labor. For all coverage options, check with your independent Trane dealer.

Independent Trane dealers value reliability as much as you do.

Your independent Trane dealer knows his or her reputation is made at every sale, and with every installation. Therefore, they are as personally invested in your comfort as you are, and take great pride in creating your perfect indoor environment.

Trane dealers are some of the most highly-trained in the business, with advanced technical skills to optimize every installation and solve any issue.

They have an extensive understanding of the movement and conditioning of air, and the expertise to create a perfectly balanced, ultra-efficient system for every home.

Trane dealers believe in doing the job right, every time. Otherwise, they wouldn't be Trane dealers.

Ask your dealer how to get total control from anywhere.

For an entirely new level of control, the Trane ComfortLink™ Remote Thermostat and Schlage LiNK™ interface* allow you to monitor and adjust your home's temperature remotely with most web enabled cell phones or computers. With the Schlage LiNK™ system in place, you can also control many aspects

of your home, from door locks, lighting, appliances and home theater components. You can even monitor an optional live video feed. It's a whole new level of convenience, automation, and security available from your Trane dealer.
